

三态输出记录 (Three-State Output Record)

S1 • 重建失败 (Reconstruction Failure)

解析或几何重建异常中断

→ reconstruct_fail (Exception during Steps 1-7)

S2 • 无效 B-rep (Invalid B-rep)

生成模型包含自交等错误, BRepCheck = False

→ invalid_brep (Exported but fails topology validation)

S3 • 有效 B-rep (Valid B-rep)

流形与拓扑完全正确, BRepCheck = True

→ valid_brep (Successfully validated and exported)
